Employment

OPENCLASSROOM MENTOR ON THE WEB DEVELOPER COURSE

Jan 2021 - Apr 2023

Openclassroom, Yaoundé

1. Booki is a small company offering a vacation planning tool. Their site allows users to find accommodation and activities in the city of their choice. Accommodations can also be filtered by theme, for example their budget or their atmosphere. Before definitively validating this design, the company decides to create a prototype. The first step is to integrate the responsive mockup in HTML and CSS. <https://ndohvich.github.io/Booki/index.html>
2. Ohmyfood! is a young startup that would like to establish itself in the catering market. The goal is to develop a 100% mobile site that lists gourmet restaurant menus so customers can order online. <https://ndohvich.github.io/OhMyFood/>
3. Implementation of an architect's website thanks to the creation of a dynamic site with JavaScript communicating with an API. <https://creation-d-une-page-dynamique.vercel.app/>
4. Implement the front end of Kasa, a housing rental application. Set up components with React and application routes with React Router. <https://projet-7-opn.vercel.app/>
5. Plan each step of the project to develop a menu creation site for restaurateurs https://github.com/ndohvich/Projet_4_dev_web_openclassroom
6. This is my personal page where I show all my projects and my knowledge. It was made in react. <https://portefolio-ruddy.vercel.app/>
7. Implementation of a testing application for a young talent recruitment company. shiny-agency. <https://spa-react-henna.vercel.app/>
8. Implementation of a modern and fun social network for businesses. <https://mern-tchat-main.vercel.app/>
9. Implementation of a gastronomic reviews application. <https://github.com/ndohvich/Application-d-avis-gastronique-So-Pekocko>
10. Setting up a NodeJs Xpress Handlebars CRUD system. https://github.com/ndohvich/CRUD_NodeJs_Express
11. Command line application which allows me to retrieve data from <https://coinmarketcap.com/> in order to have the latest updates of the different cryptocurrencies. https://github.com/ndohvich/web_scrapping
